Actuators for Central Locking Systems

Version 2.0

Notes about the Structure of the Catalogue

Contents

This catalogue contains product information about actuators for central locking systems from the Siemens VDO brand.

Structure

The first section contains information on the company and its product brand, Siemens VDO.

The subsequent product section is divided up according to product group. At the start of each subsection there is an overview of all the model variants within the respective product group, followed by a section where the corresponding individual model variants are arranged by vehicle make and model. The list of cross-references at the back of the catalogue features the individual products arranged by OE/Article No. Other relevant information such as technical details, etc. is given in the legend.

Abbreviations and symbols

An overview of all the abbreviations and symbols used in the catalogue can be found on the foldout page at the back of the catalogue.

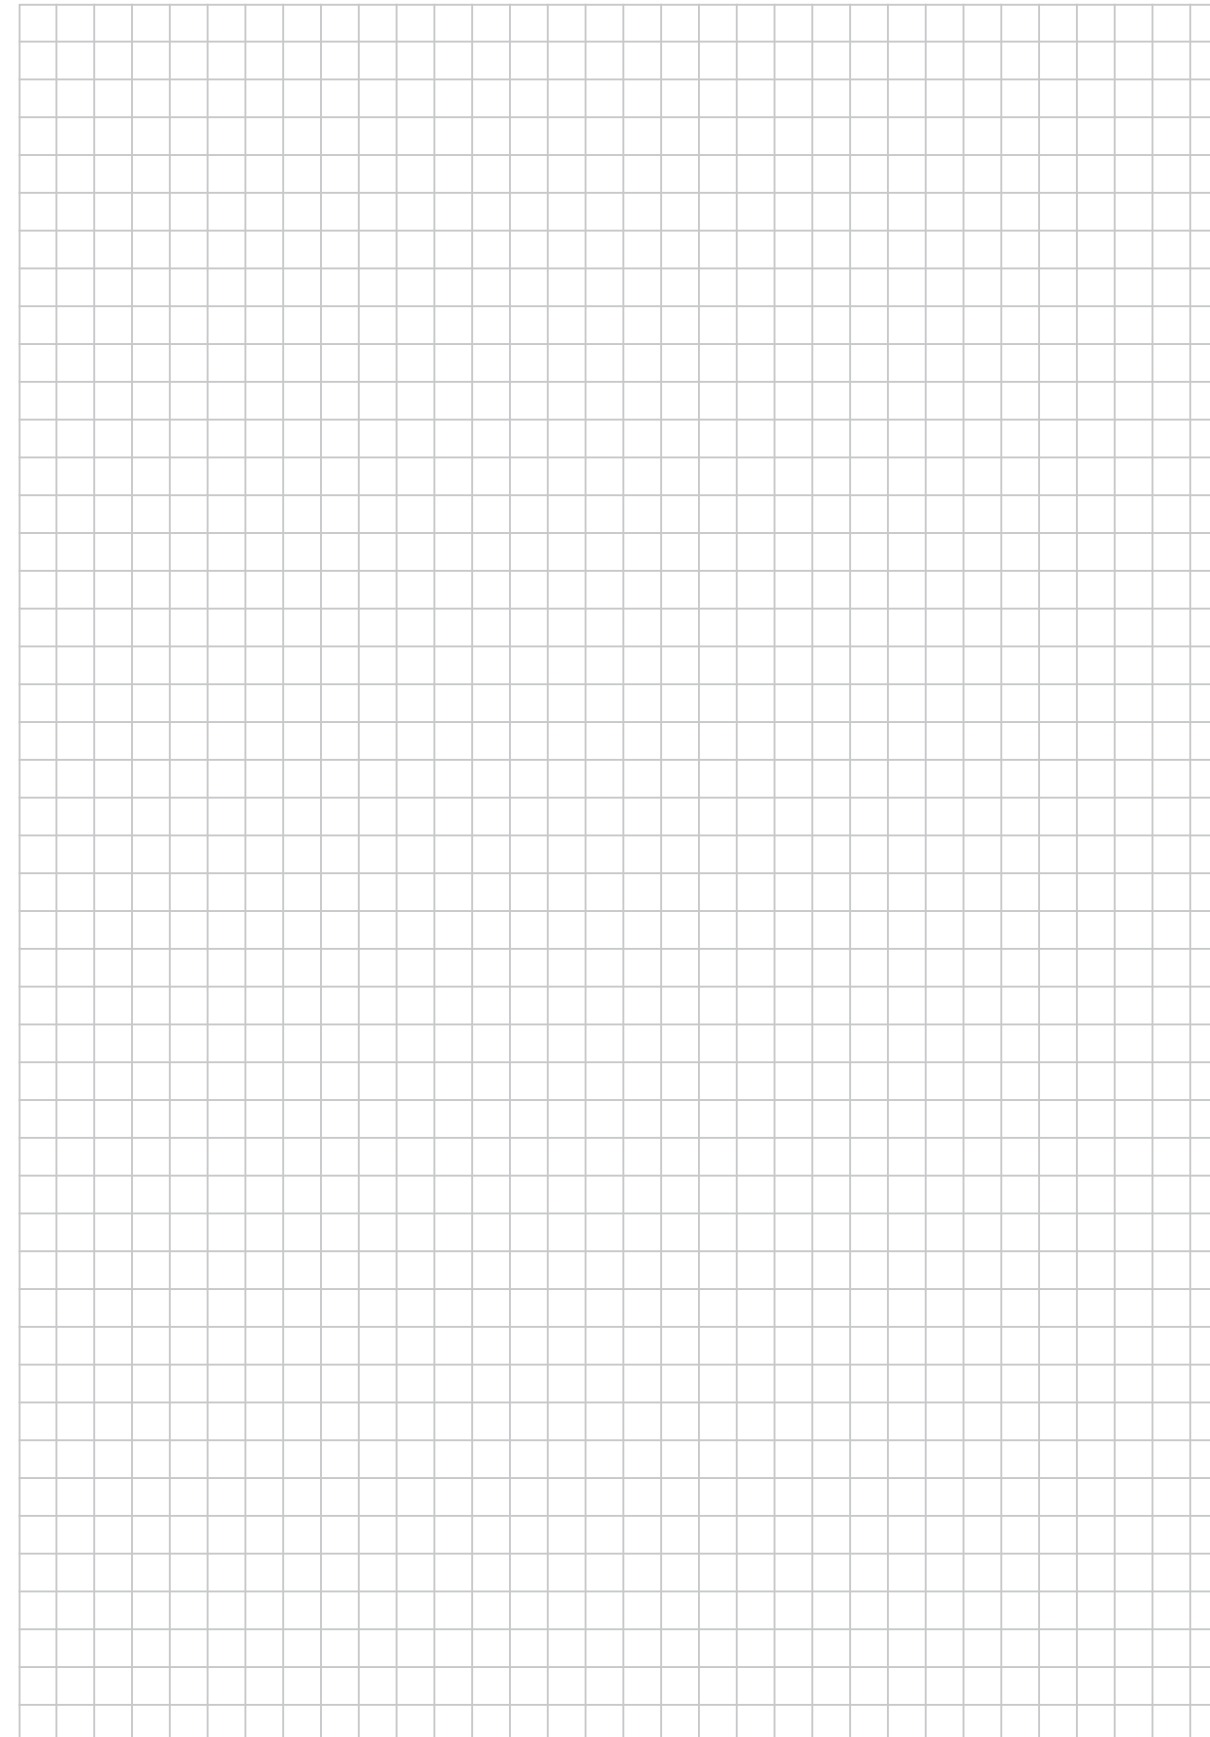

ⓘ Please note:

Application

The products described in this catalogue are designed for use in land vehicles, engines and equipment.

Disclaimer

The data in the Siemens VDO replacement parts catalogue has been compiled and processed to the best of our knowledge for the purpose of presenting Siemens VDO replacement parts range. Subject to technical alterations, errors and omissions. The details are not binding for the availability. We cannot be made liable for any legal reason for the details in the Siemens VDO replacement parts catalogue, as long as there is no intention or gross negligence involved.

The Company

As one of the leading suppliers to the automotive industry, Siemens VDO Automotive develops cutting-edge technologies, system solutions and products that offer drivers greater enjoyment, safety and comfort – today and tomorrow. The service operations of the Siemens VDO Automotive group are concentrated in a highly focused entity – the Service & Special Solutions business unit, represented in Germany by Siemens VDO Trading GmbH. With 2,600 employees and a presence in 80 countries, we are one of the leading companies in today's automotive aftermarket.

Our product portfolio ranges from navigation, in-car multimedia and high-quality car audio systems to spare parts for passenger cars and commercial vehicles such as fuel supply pumps and tachographs, fleet management systems, special OEM series for industrial and marine products and end-of-series replacement parts provision for car manufacturers.

Siemens VDO is the product brand for genuine brand replacement parts, including fuel supply and engine actuators, HVAC blower and fan systems, screen and headlight washer systems, actuators for central locking systems and sensors.

The Siemens VDO brand supplies customer-focused, innovative and, above all, practical solutions featuring original equipment quality. Siemens VDO – delivering expertise in the field of genuine brand replacement parts.

Outstanding quality and outstanding service

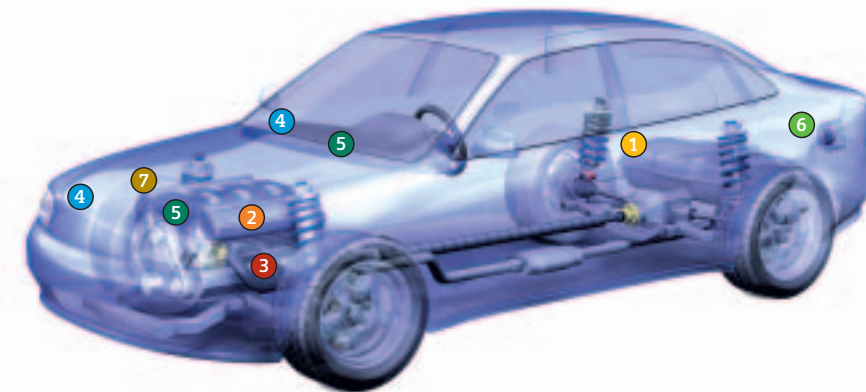

Thanks to stringent quality management, Service & Special Solutions has DIN EN ISO 9001: 2000 and VDA 6.2 certification. In addition, our products meet all road traffic regulations relating to the German and international markets.

Quality Management System
DIN EN ISO 9001 : 2000

Locking and unlocking made easy

Actuators are an integral part of modern cars. More and more mid-range and smaller vehicles are being fitted with comfort functions that lock and unlock doors, windows and other lockable parts at the touch of a button.

Sometimes products can fail due to an accident or electronic defect. Siemens VDO genuine brand replacement parts allow high-quality replacements to be fitted easily in all kinds of vehicle makes and types, while minimising installation expense.

Siemens VDO actuators (central locking systems, closing devices and window controls) have been offering reassuring security and convenience for over 20 years.

- The product range includes actuators for:
- Doors
 - Tailgates, Rear windows and Boot lids
 - Fuel filler flaps

Actuators for Central Locking Systems

How they work

Actuators are used in vehicles to lock and unlock doors, windows and other lockable parts. They are controlled via the central locking system and/or the remote opening switch (e. g. fuel filler flaps, boot lids).

The actuator contains a DC motor, which operates a lifter with a defined length of travel via gears or centrifugal clutch to activate and deactivate the lock. Some actuators also feature a central locking switch.

As well as lifters which move freely when not under power, there are also lifters with a reset spring that returns the lifter to the neutral position. Additionally, in some models the lifter may be retained by a latch mechanism in defined operational states for anti-theft protection.
